PCR Material

Bottle color changing for different PCR percentages

Bottles and jars produced by Post-Consumer Resin (PCR) represent a growing trend in protecting the earth's environment and reusing resources, as well as the development trend in the packaging industry. PET packing materials are at the forefront of this trend. PET (Polyethylene terephthalate) is one of the most common plastics in the world, and it is one of the easiest plastics to recycle. Our company has been achieved the production of 100% PCR products.

All PP,PET,PE bottles,jars and tubes we have now are available with different percentage of PCR material,pls confirm with our team for more detailed information.

PLA Material

**PLA
BIODEGRADABLE
MATERIALS**

Model No.: R-PLAB01

Model No.: R-PLAC01

PLA is a biodegradable and sustainable material derived from renewable resources like corn starch or sugarcane.

WHY CHOOSE PLA?

- 1.Sustainability: PLA is derived from renewable resources like corn starch or sugarcane, making it an environmentally friendly choice for beauty packaging.
- 2.Reduced Carbon Footprint: PLA has a lower carbon footprint compared to traditional plastics, as it emits fewer greenhouse gases during production.
- 3.Compostability: PLA is compostable, meaning it can naturally break down into harmless components, reducing environmental pollution.

BAMBOO Packaging

Bamboo, as a versatile and sustainable material, is gaining popularity in skincare packaging.

Eco-Friendly:

Bamboo is a renewable resource that grows rapidly, making it highly sustainable. It requires fewer resources and releases more oxygen compared to traditional tree-based packaging materials.

Strength and Durability:

Bamboo is known for its strength and durability, making it suitable for protecting skincare products during transportation and storage.

Very Small MOQ: We can start from 100pcs, which is friendly for startup skincare brands.
